# About us

AMAGE Systems is an IT company delivering solutions for the construction sector as well as industrial and manufacturing companies. Our motto is "assets under control" — we help customers manage their assets in a complete and well-organized way.

Use cases

- Automated document processing (scanned)
- Document analysis: summaries, briefs, reports
- Technical and project documentation management
- Support for maintenance processes- Chatbots supporting employees in day-to-day tasks, available on the AMAGE platform and in mobile applications.
- Dedicated solutions for specific customer processes.

AI/ML solutions

Our platform:
- Automates repetitive tasks (especially work with documents and data) and shortens process handling time.
- Supports decision-making through content and data analysis from AMAGE systems.
- Assists employees in day-to-day work via conversational solutions (chat/agent) in web and mobile applications.

Technologies and approach

- Language models (LLMs), including private deployments
- Agent-based AI architecture
- Document and knowledge processing: multimodal RAG, OCR, NLP
- Edge computing: devices for local data/ML processing and IoT integration with the AMAGE platform
